#### STRATEGY

**GEA** 

GeaSphere Advisors builds investment portfolios using our proprietary research philosophy called the "GeaSphere Analysis System". All our model portfolios use our exclusive methods and historical data base as the foundation for our portfolio construction and management.

GeaSphere offers 10 Core ETF model portfolios for every risk tolerance and time horizon. All models are constructed with our rules base allocation, adjusted for market conditions. We continuously review and adjust the weightings of each asset class within each portfolio reflect leading sectors for maximum efficiency and returns. Clients should use the following categories as a guide for determining which portfolios to invest in.

Risk of Loss: The value of securities and other investments may move up or down, sometimes rapidly and unpredictably. Securities markets can be volatile. A client account may at any point in time be worth less than its initial value. Regardless of how well an individual investment performs, if financial markets decline, you could lose money. Investment in specific securities involves risks of loss due to a variety of reasons.
